

POSTER PROGRAMME

Code	POSTER PROGRAMME – TITLE/AUTHORS	Page
P1	Hydrogen Transfer Reactions Catalyzed by Palladium/Carbon on Triazolopyridines and Quinolines. Zinc/Water/Ethanol as Hydrogen Donors <i>Belén Abarca, Rosa Adam, Rafael Ballesteros, Sonia López</i>	77
P2	Enzymatic resolution and separation of sec-alcohols based on biodiesel component as acylating agents <i>Carlos M. Monteiro, Nuno M. T. Lourenço, Carlos A. M. Afonso</i>	79
P3	Bisamino Amides as Chiral Solvating Agents for Carboxylic Acids <i>Belén Altava, Noèlia Carbó, M. Isabel Burguete, Jorge Escorihuela, Santiago V. Luis</i>	81
P4	Fermentable sugars from Arbutus Unedo for bioethanol <i>Maria Emília Amaral, Marta Moran, Nuno Gil, Ana Paula Duarte</i>	83
P5	Recycling and Transformation of Palm Shell Waste to Adsorbent Material for Environmental Application <i>M. Oulad, M. K. Aroua, W. A. W. Daud</i>	85
P6	Recycling of Spent Bleaching Earth (SBE) from Palm Oil Refinery to Produce Biodiesel <i>Mohamed K. Aroua, Aziz A. Raman, Saeid Baroutian, Y. Y. Lai, W. H. Yui</i>	87
P7	Hydrothermal carbon from biomass: recent advances in synthesis, one pot functionalization and fine structure resolution by ¹³ C solid state NMR <i>Niki Baccile, Florence Babonneau, Guillaume Laurent, Maria-Magdalena Titirici, Markus Antonietti</i>	89
P8	Norbornene derivatives synthesized in catalytic system based on Lewis-acid and pyridinium ionic liquid <i>Bożena Bittner, Eugeniusz Milchert, Ewa Janus</i>	91
P9	Solubility in supercritical CO ₂ of two precursors in the synthesis of metal-SiO ₂ inverse opals: Pd(hfac) ₂ and Ni(hfac) ₂ <i>M. José Tenorio, Concepción Pando, Juan Antonio R. Renuncio, Albertina Cabañas</i>	93
P10	New Trends on Green Transformer Oils; The Brazilian Experience <i>José O. B. Carioca, Raimundo Guilherme C, Corrêa, Paulo Cesar M. Carvalho, João J. Hiluy Filho</i>	95
P11	Methoxylation of α-pinene over silica-included heteropolyacids <i>Dália S. Pito, Isabel M. Fonseca, Ana M. Ramos, Joaquim Vital, José E. Castanheiro</i>	97
P12	Hydrolysis of sucrose over zeolites dispersed in PVA <i>Dália S. Pito, Isabel M. Fonseca, Ana M. Ramos, Joaquim Vital, José E. Castanheiro</i>	99
P13	Esterification of glycerol with acetic acid over tungstophosphoric acid supported on silica <i>Patrícia Ferreira, Isabel M. Fonseca, Ana M. Ramos, Joaquim Vital, José E. Castanheiro</i>	101
P14	Turning Brown Chemistry Green: Safe, Efficient, Economical and Recyclable Brominating Agents <i>Samuel Braverman, Marina Cherkinsky</i>	103
P15	Environmental effects of waste to energy processes in Korea <i>Ki-In Choi, Suk-Hui Lee</i>	105
P16	The leaching characteristics of persistent organic pollutants (POPs) from municipal solid waste (MSW) landfill <i>Ki-In Choi, Zel-Ho Choi, Suk-Hui Lee</i>	107
P17	Solvent-free Halogenation of Aryl Amines via Stable Arenediazonium Tosylates <i>Young Hwa Choi, Mi-Eun Moon, Young Min Lee, Young Ho Song, Ki-Whan Chi</i>	109

Code	POSTER PROGRAMME – TITLE/AUTHORS	Page
P18	Effective E-factors – making them meaningful at the bench-scale <i>Andrew Churchard</i>	111
P19	2 ^o Generation Biofuel: glycerol derivatives as biodiesel additives <i>Miriam de Torres, Gonzalo Jiménez-Osés, José Antonio Mayoral, Elisabet Pires, Beatriz Villamón</i>	113
P20	Chitosan SILP catalysts in palladium catalyzed allylic substitution <i>Renaud Moucel, Pierre-Jean Madec, Annie-Claude Gaumont, Isabelle Dez</i>	115
P21	Direct oxidative carbonylation of glycerol <i>Patrick Winnertz, Angelina Prokofieva, Franco Doro, Walter Leitner, Thomas Müller</i>	117
P22	Catalytic Pyrolysis of High Density Polyethylene in Continuous Mode over Bentonite in a Conical Spouted Bed Reactor <i>Gorka Elordi, Martin Olazar, Maite Artetxe, Maider Amutio Gartzzen Lopez, Roberto Aguado</i>	119
P23	Catalytic cracking of a mixture of atmospheric residue and VGO under industrial unit conditions <i>José M. Arandes, Iker Torre, Miren J. Azkoiti, Javier Ereña, Javier Bilbao</i>	121
P24	Polymer-Supported Chiral α -Amino Amides for the Asymmetric Addition of Diethylzinc to Aldehydes: Transforming a non-effective homogeneous system into a highly selective catalyst <i>Jorge Escorihuela, Belén Altava, M. Isabel Burguete, Santiago V. Luis</i>	123
P25	Solvent-less Olefin Epoxidation Catalysed by Rhenium Complexes <i>Agustín Galindo, Matthew Herbert, Francisco Montilla</i>	125
P26	Physico-chemical and biological properties of imidazolium and pyridinium based ionic liquids <i>M. Teresa García, Anna Cornellas, Lourdes Pérez, M. Angeles Manresa, Francesc Comelles, Isabel Ribosa</i>	127
P27	One-pot Multistep Reaction: Epoxidation – Epoxide Ring Opening with Trimethylsilyl cyanide <i>José M. Fraile, Nuria García, Clara I. Herrerías, José A. Mayoral, Ana C. Miñana</i>	129
P28	Thermophysical Properties of Environmental Friendly Mixtures: Linalool + Ethanol <i>Laura Vitoria, Sandra M. García-Abarrio, Marcos Torcal, José S. Urieta, Ana M. Mainar</i>	131
P29	Green catalytic oxidation using air, water soluble palladium complex and glycerol-based solvents <i>Héctor García-Marín, María Mifsud, José A. Mayoral, José I. García, Isabel W. C. E. Arends.</i>	133
P30	Carbohydrates as a renewable source for bioethanol production <i>Nuno Gil, Fernanda Domingues M. Emilia Amaral, Ana Paula Duarte</i>	135
P31	Degradation of Natural Rubber via cross-Metathesis with high functionalized olefins. <i>Selena Gutiérrez, Mikhail A. Tlenkopatchev</i>	137
P32	The Electrochemical Way: A Suitable Alternative Process for the α -Alkoxylation of Carbamates <i>M. Luisa Haya, Juan I. Pardo, F. Javier Sayago, Ana M. Mainar, C. Cativiela, Jose S. Urieta</i>	139
P33	Olefin Epoxidation in Ionic Liquids by Hydrogen Peroxide with Oxidiperoxomolybdenum catalysts <i>Matthew Herbert, Francisco Montilla, Raquel Moyano, Antonio Pastor, Eleuterio Álvarez, Agustín Galindo</i>	141
P34	A novel Ru _x Rh _y (CO) _n bimetallic catalyst with potential for PEM fuel cell applications <i>Hugo M. Hernández-Hernández, Jorge Uribe-Godínez, Roberto Hernández-Castellanos, Omar Jiménez-Sandoval</i>	143

Code	POSTER PROGRAMME – TITLE/AUTHORS	Page
P35	Ru _x Ir _y (CO) _n : A new electrocatalyst for oxygen reduction and hydrogen oxidation, with potential applications in PEM fuel cells <i>Hugo M. Hernández-Hernández, Jorge Uribe-Godínez, Roberto Hernández-Castellanos, Omar Jiménez-Sandoval</i>	145
P36	<i>N,N</i> -Dialkylhydrazones as stable class of imine surrogates in an environmentally-friendly Strecker reaction <i>Eugenia Marqués-López, Raquel P. Herrera, Rosario Fernández, José M. Lassaletta</i>	147
P37	Easy synthesis of paddlewheel diruthenium complexes with <i>N,N</i> -donor ligands using microwave activation <i>Santiago Herrero, Reyes Jiménez-Aparicio, Josefina Perles, Francisco A. Urbanos</i>	149
P38	The Influence of the Support on the Formation of Ni ₂ P Based Catalysts by a New Synthetic Approach. Catalytic Activity in the HDS of Dibenzothiophene. <i>A. Jiménez-López, J.A. Cecilia, A. Infantes-Molina, E. Rodríguez-Castellón</i>	151
P39	Heterogeneous catalysts based on Zr-MCM-41 for esterification of free fatty acid contained in used vegetable oil <i>I. Jiménez-Morales, J. Santamaría-González, P. Maireles-Torres, A. Jiménez-López</i>	153
P40	Chemicals from Lignin <i>Amrit Johal, Sunil Joshi, Martyn Poliakoff</i>	155
P41	Kinetic Study of Catecholamines in the Presence of Nitrous Acid under Mild Acidic Conditions <i>Lida Khalafi, Mohammad Yari</i>	157
P42	Effect of the support on the activity and stability of Ni based catalyst for hydrogen production by ethanol steam reforming <i>Jorge Vicente, Carolina R. Montero, Aingeru Remiro, Javier Ereña, Ana G. Gayubo</i>	159
P43	Acidity evaluation by ammonia adsorption of supported metal catalysts derived from alumina-pillared clays <i>Flávia C.C. Assis, A. Gil, S.A. Korili</i>	161
P44	Development of a suitable growth strategy for intensive propagation and lactic acid production of selected strains of Lactobacilli <i>M.P.Zacharof, R.W. Lovitt, K. Ratanapongleka</i>	163
P45	Bacteria-produced nanocellulose – A fascinating biopolymer. Bioprocess design and application <i>Dana Kralisch, Sabine Huebschmann</i>	165
P46	Thermophysical properties of some Ionic Liquids and Ionanofluids <i>Elisa Langa, Ana L. Morais, Ana P. C. Ribeiro, Salomé I. C. Vieira, Manuel. L. Matos Lopes, Maria. J. V. Lourenço, Fernando J. V. Santos, Ana M. Mainar, Carlos. A. Nieto de Castro</i>	167
P47	Microwave Dielectric Relaxation Spectroscopy of Imidazolium/Alkylsulfate and Tosylate Ionic Liquids <i>Santiago Aparicio, Rafael Alcalde, Begoña García, José M. Leal</i>	169
P48	Preparation and Photocatalytic Activity of Metal(Fe,Zn) Doped SiO ₂ /TiO ₂ Composite Nanofibers <i>Sung Wook Lee, Sang Beom Kim, DongHo Hyun</i>	171
P49	A Novel Separation of Butanol Using Zeolite Membrane <i>Jeongsik Oh, Dongjae Jeong, Ina Yum, Yongtaek Lee</i>	173
P50	The synthesis of new environmentally friendly catalytic material(HTS)* <i>Min Lin, Bin Zhu, Chunfeng Shi, Xingtian Shu, Xieqing Wang</i>	175
P51	Pyrolysis of waste tyres in a conical spouted bed reactor, effect of tyre material composition <i>Gartzen López, Gorka Elordi, Maider Amutio, Maite Artetxe, Martin Olazar, Javier Bilbao</i>	177

Code	POSTER PROGRAMME – TITLE/AUTHORS	Page
P52	The Interuniversity Master and Ph. D. Degrees on Sustainable Chemistry: An Educational Initiative on Green Chemistry <i>Santiago V. Luis, B. Altava, M. Isabel Burguete, R. Mestres</i>	179
P53	A novel chiral synthone from biomass. Production of an anhydro isosaccharino- δ -lactone from catalytic pyrolysis of cellulose and its application to the synthesis of bio-mimetic molecules <i>Danilo Malferrari, Andrea Defant, Daniele Fabbri, Ines Mancini, Cristian Torri</i>	181
P54	Evaluation of the effects of oxygenated-imidazolium ionic liquids at different biological organization levels <i>Danilo Malferrari, Chiara Samorì, Paola Valbonesi, Adele Montecavalli, Fabio Moretti, Paola Galletti, Giorgio Sartor, Emilio Tagliavini, Elena Fabbri, Andrea Pasteris</i>	183
P55	Optimization of the supercritical fluid extraction of grape seed oil <i>Luis Martín, Ingrid Marín, Ana M. Mainar, Ricardo López, Juan Cacho, José S. Urieta</i>	185
P56	Bioinspired approaches to the synthesis of pseudopeptidic macrocycles: combination of experimental and in-silico technologies <i>Vicente Martí, Jenifer Rubio, Prashant D. Wadhavane, M. Isabel Burguete, Santiago Luis</i>	187
P57	Direct synthesis of Glycerol carbonate from glycerol and scCO ₂ <i>Víctor Martínez-Merino, María José Gil, Ignacio Larrañaga</i>	189
P58	Synthesis of 3,4-dihydro-2H-1,3-benzoxazines from cardanol and sustainable production of bio-composites <i>Giuseppe Mele, Selma E. Mazzetto, Mohamed S. Behalo, Iolanda Pio, Orazio A. Attanasi</i>	191
P59	Green food additives through near-critical fluid extraction <i>J.A. Mendiola, P.J. Martín-Álvarez, F.J. Señoráns, G. Reglero, A. Capodicasa, F. Nazzaro, A. Sada, P. Tremonte, A. Cifuentes, E. Ibáñez</i>	193
P60	SPEEK/silica composite membrane synthesis and characterization for PEM fuel cells <i>Aranzazu Barrio, Irantzu Amorena, Federico Mijangos, José Ignacio Lombraña</i>	195
P61	Ion exchange kinetics to production of struvite with amberlite IRC86 resin <i>M. Arrate Celaya, Monika Ortueta, Federico Mijangos</i>	197
P62	First Examples of Copper-TEMPO Catalysed Alcohol Oxidation in Supercritical Carbon Dioxide <i>Francisco Montilla, Matthew Herbert, Agustín Galindo</i>	199
P63	Biosynthesis of silver nanoparticles by <i>Citrus paradisi</i> (Grapefruit) <i>Victor A. Nolasco Arizmendi, Borja M. Avalos, Néstor A. R. Vilchis, Víctor Sánchez Mendieta, Raúl A. Morales Luckie</i>	201
P64	Green synthesis of isoamyl acetate in glycerol triacetate <i>Adi Wolfson, Christina Dlugy, Dorith Tavor</i>	203
P65	Degradation of polycyclic aromatic compounds by fungal glutathione transferases <i>Andrew A. Ngadin, Melanie Morel, Jean-Pierre Jacquot, Eric Gelhaye</i>	205
P66	Bisphenol-A Recovering from Compact Disc Wastes under Microwave Irradiation <i>Mir Mohammad Alavi Nigjeh, Fateme Haji Agha Mohammadi</i>	207
P67	A continuous method to perform phase transition monitoring at sub- and supercritical water systems <i>Alexander A. Novitskiy, Eduardo V. Pérez, Victor N. Bagratashvili, Martyn Poliakov</i>	209
P68	Lysine-based cationic surfactants: synthesis and study of the effect of the polar group on their biological properties <i>L. Pérez, A. Colomer, A. Pinazo, M^a P. Vinardell, M. Mitjans, M.R. Infante, M.T. García, I. Ribosa, M. A. Manresa</i>	211

Code	POSTER PROGRAMME – TITLE/AUTHORS	Page
P69	Microwave assisted synthesis of elusive tetrakis(diaryltriazenido)diruthenium complexes <i>Santiago Herrero, Reyes Jiménez-Aparicio, Josefina Perles, José Luis Priego, Francisco A. Urbanos</i>	213
P70	Isomerization-Hydroformylation of Internal Olefins: New Modular H ₈ -BINOL-based phosphite ligands <i>Irene Piras, Reiko Jennerjahn, Ralf Jackstell, Wolfgang Baumann, Anke Spannenberg, Robert Franke, Klaus-Diether Wiese, Matthias Beller</i>	215
P71	Synthesis and application of novel enantiopure chiral imidazolium ionic liquids <i>Eduardo Busto, Raul Porcar, Vicente Gotor-Fernández, Nicolás Ríos-Lombardía, Eduardo García-Verdugo, Ignacio Alfonso, M. Isabel Burguete, Santiago V. Luis, Vicente Gotor</i>	217
P72	First iron-catalyzed reaction of t-butyl nitrite with styrenes in the presence of BH ₄ ⁻ ion <i>Saisuree Prateeptongkum, Irina Jovel, Ralf Jackstell, Nadine Vogl, Christoph Weckbecker, Matthias Beller</i>	219
P73	Recycling of Calcium Fluoride Sludge in the Stabilization of Fly Ash <i>Tahir Imran Qureshi, Young-Ju Kim</i>	221
P74	Electrochemical Oxidation of Catechols in the Presence of Diethyl phosphite <i>Mohammad Rafieeand Babak Kaboudin</i>	223
P75	Salt promoted hydrothermal organic synthesis <i>Sabine Raith, Frédéric Goettmann, Markus Antonietti, Werner Kunz</i>	225
P76	Regeneration of Spent Bleaching Earth (SBE) from Palm Oil Refinery <i>Aziz A. Raman, Mohamed K. Aroua, Saeid Baroutian, K.L Ng, Y.L Ng</i>	227
P77	Gold nanoparticles (AuNPs) immobilised onto Supported Ionic Liquids Like Phases (SILLPs) <i>Julián A. Restrepo, Eduardo García-Verdugo, M. Isabel Burguete, Santiago V. Luis</i>	229
P78	Using hydrotalcite for biodiesel production <i>Juan A. Reyes-Labarta, Remedios Hernández, Natalia Guilló, Francisco Valdés</i>	231
P79	Synthesis of Optically Active Sulfoxides by BVMOs as Oxidative Biocatalysts <i>Ana Ríoz-Martínez, Gonzalo de Gonzalo, Daniel E. Torres Pazmiño, Marco W. Fraaije, Vicente Gotor</i>	233
P80	Physical Chemistry Study of a Cyclopropanation Reaction in Supercritical Carbon Dioxide <i>Clara Rivas, Manuela Artal, José María Fraile, Sofía Blanco, Inmaculada Velasco</i>	235
P81	Stereoselective chemoenzymatic preparation of β-amino esters: Application to the synthesis of (S)-Dapoxetine <i>María Rodríguez Mata, Vicente Gotor-Fernández, Eduardo García-Urdiales, Vicente Gotor</i>	237
P82	Use of microwave irradiation for the sustainable synthesis of ureidotriazines <i>Amparo Ruíz-Carretero, Ana S. Migallón, Antonio de la Hoz.</i>	239
P83	A C–H···O Hydrogen Bond Is the Key of the High Enantioselectivities of Asymmetric Catalyzed C–H Carbene Insertion Reactions <i>José A. Mayoral, Sergio Rodríguez-Rodríguez, Luis Salvatella</i>	241
P84	The Master's Course in Sustainable Chemistry of the Zaragoza University: The First Spanish EHEA-adapted Master's Degree <i>Luis Salvatella, Ana M. Mainar, José S. Urieta</i>	243
P85	Switchable solvents for the extraction of potential biofuels from algae <i>Chiara Samori, Cristian Torri, Giulia Samori, Daniele Fabbri, Paola Galletti, Franca Guerrini, Rossella Pistocchi, Emilio Tagliavini</i>	245

Code	POSTER PROGRAMME – TITLE/AUTHORS	Page
P86	New CNC palladium pincer complexes: An excellent, more sustainable choice for Suzuki-Miyaura couplings in water <i>Blanca Inés, Raul SanMartín María Jesús Moure, Esther Domínguez</i>	247
P87	Novel montmorillonite supported synthesis of benzofuran-2(3H)-ones via condensation of benzil with phenols <i>Ali Sharifi, Mojtaba Mirzaei, M. Saeed Abaee</i>	249
P88	Effect of feed composition over deactivation of a CuO-ZnO-Al ₂ O ₃ /g-Al ₂ O ₃ bifunctional catalyst in the synthesis of dimethyl ether <i>Irene Sierra, Javier Ereña, Andrés T. Aguayo, José M. Arandes, Javier Bilbao</i>	251
P89	Creating new environment-benign solvents: Enthalpic assessment interactions of ionic liquids with molecular solvents <i>Geetanjali Singh, Anil Kumar</i>	253
P90	Enzymic hydrolysis of concentrated raw starch suspensions <i>Georges Tawil, Paul Colonna, Anders Viksø-Nielsen, Alain Buléon</i>	255
P91	Novel chiral imidazolium-based ionic liquids derived from carvone <i>Emilia Tojo, Francisco Santamarta, Yagamare Fall</i>	257
P92	Green Process Development: Phase Equilibrium of 1,8-Cineole + 1-Propanol <i>Marcos Torcal, Sandra M. García-Abarrio, Laura Vilorio, Juan I. Pardo, José S. Urieta, Ana M. Mainar</i>	259
P93	Converting cellulose/sacarose/fructose into biofuel: New biofuels <i>Francisco Torrens, Gloria Castellano</i>	261
P94	Comparative study of conventional, solvothermal, and microwave assisted synthesis of nickel complexes <i>Miguel Cortijo, Reyes Jiménez-Aparicio, José Luis Priego, M. Rosario Torres, Javier Torroba, Francisco A. Urbanos</i>	263
P95	Catalytic properties of iridium carbonyl clusters for oxygen reduction and hydrogen oxidation, synthesized in a reductive atmosphere <i>Jorge Uribe-Godínez, Hugo M. Hernández-Hernández, Roberto Hernández-Castellanos, Omar Jiménez-Sandoval</i>	265
P96	Iridium based electrocatalysts for oxygen reduction and hydrogen oxidation, in the presence of fuel cell contaminants. <i>Jorge Uribe-Godínez, Hugo M. Hernández-Hernández, Roberto Hernández-Castellanos, Omar Jiménez-Sandoval</i>	267
P97	Contaminant-tolerant rhodium electrocatalysts for oxygen reduction and hydrogen oxidation. Prospects for PEM fuel cell applications <i>Jorge Uribe-Godínez, Hugo M. Hernández-Hernández, Roberto Hernández-Castellanos, Omar Jiménez-Sandoval</i>	269
P98	Integration of Pyrolytic Lignin Valorisation and Crude Bio-oil Transformation <i>Beatriz Valle, Ana G. Gayubo, Andrés T. Aguayo, Martín Olazar, Aingeru Remiro, Javier Bilbao</i>	271
P99	Recycling of the protein fraction from tannery waste water: Its use for the production of surface active agents <i>Agustí Marsal, Elena Bautista, Sara Cuadros, A. Rius, J. Font</i>	273
